Beware of Ointments for Catarrh that Contain Mercury.

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Kentucky Crop Report.

The first half of the month of June was quite wet, raining nearly every day. Severe storms of wind and hail in some localities. Corn planting, especially in lowlands, that was already late, was still further retarded by these excessive rains. The early planted corn suffered for cultivation and many fields became foul with grass and weeds. The latter half was almost ideal, and gave farmers a splendid opportunity to get their wheat in the shock in good condition, and wage a war on the weeds that were rapidly taking their corn fields.

The acreage of corn is a little short of last year owing largely to the unfavorable weather that continued too late in the season for preparation of much of the low lands that would have been planted under favorable conditions. The condition of the corn crop is not up to the standard for the reason stated and that much bad seed was planted and failed to germinate, causing a great deal of replanting and making the crop very irregular. The wheat crop improved materially during the month, but will fall short of an average crop. While the yield will be less than an average, the berry promises to be very fine. The prospective yield is 16 per cent less than the 1906 crop. Oats promise only about three fourths of the 1906 crop. Many counties report the crop almost a failure and only a few report a prospect for a full crop. Rye promises some better, but considerably below last year. Hemp is nearly up to last year in acreage and condition. Burley tobacco is reported 10 per cent short of last year in acreage, owing to scarcity of plants and labor. Much of this was planted late in June and will depend largely upon a late fall if it makes a good yield. The dark district has fallen off 28 per cent in acreage for want of plants to set a full crop. Much of this is also late. Grasses are doing fairly well, considering the damage done by the army worm. The high price and scarcity of seed out the acreage of stock peas. Potatoes promise a full crop. The fruit crop, except berries, will be a very short one. There will be something near a full crop of sorghum and millet. Much of these crops are usually planted

in July and August. On the whole the outlook is not so gloomy as appeared some weeks ago.
